Introduction

IPTVCanada.TV started with a vision to bring affordable alternatives to the traditional terrestrial, satellite, and cable television formats. Unlike downloaded media, IPTV offers the ability to stream the source media continuously. As a result, a client media player can begin playing the content (such as a TV channel) almost immediately. This is known as streaming media.

IPTVCanada.TV offers a reliable IPTV streaming platform, delivering nearly 3000 TB in streaming content per month. A simple user interface and an extensive collection of HD channels offer us the most satisfactory IPTV service in the USA, Canada, Latin America, and the UK. We broadcast thousands of live channels to stream premium HD content. Our existing customers praise the quality of the content we deliver through our IPTV service.

IPTVCanada.TV lets you watch TV anywhere. We all know how annoying it could be when you want to download an app, software, or program and you can't seem to find it on your Amazon firestick options. Hence, we made this guide to assist you in downloading and navigating through IPTVCanada.TV and IPTVSmarters Pro for Amazon Fire TV Stick with ease

Note: *There are many different apps and viewing media that the customer can choose to view IPTV, but we chose IPTVSmarters as they have an app for just about any device, its reliable, and its what we personally use.*

Installation

We're assuming that if you made it to this guide, you have already seen out installation page (<http://iptvcanada.tv/installation-apps/>) and have downloaded IPTVSmarters to your required device.

STEP 1: Opening IPTVSmarters App

When you launch IPTVSmarters, depending on the device you are using, you will notice the login screen might look slightly different. Here are some for example.

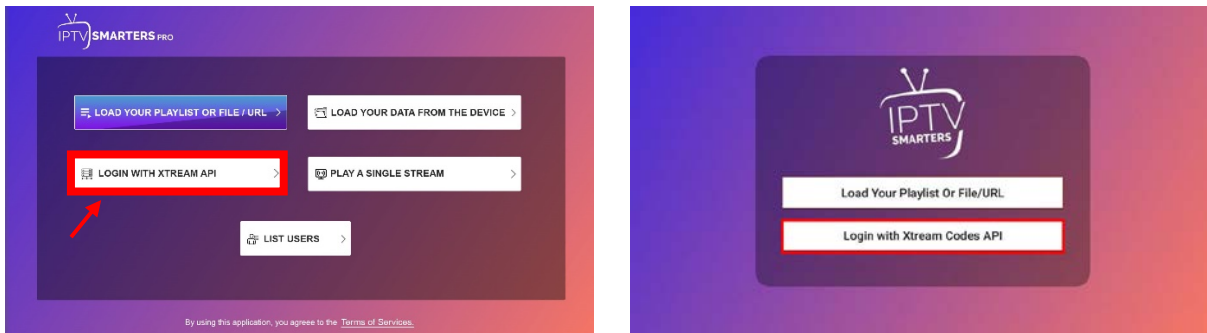

Figure 1: IPTVSmarters Xtreme Codes API

Once the app opens, if you see different menus, you would then select "Login With Xtreme Codes API". This will allow you to use the username, password, and URL that was sent with your subscription email.

STEP 2: Logging into IPTVSmarters

Before you login to IPTVSmarters, you will need the login credentials that were supplied in your subscription email. Once you place an order on our website, our system will generate login credentials (username and password). This will allow IPTVSmarters to connect to our service to verify if the information is correct. If it is, IPTVSmarters home screen will appear.

As shown below, the image to the left shows what information would be provided in the subscription email. This is the information you will need to enter into IPTVSmarters. The following information is:

- Any Name – This can be anything you chose. This is not tied to our system. So if you have multiple systems and you want one to be Bedroom and the other to be Living Room, that's up to you.
- Username – This is provided in the subscription email
- Password – This is provided in the subscription email
- URL -- This is provided in the subscription email, which will always be <http://live.iptvcanada.tv/>

Please use the following details to use your service.

Your IPTV Service Details are:

Username : 7zBrx7jH9
Password : 123456789
Portal URL : <http://live.iptvcanada.tv/>

STEP 3: IPTVSmarters Home Screen

Once you have successfully connected IPTVSmarters to our service, you will be presented with the home screen, as shown in Figure 3 below.

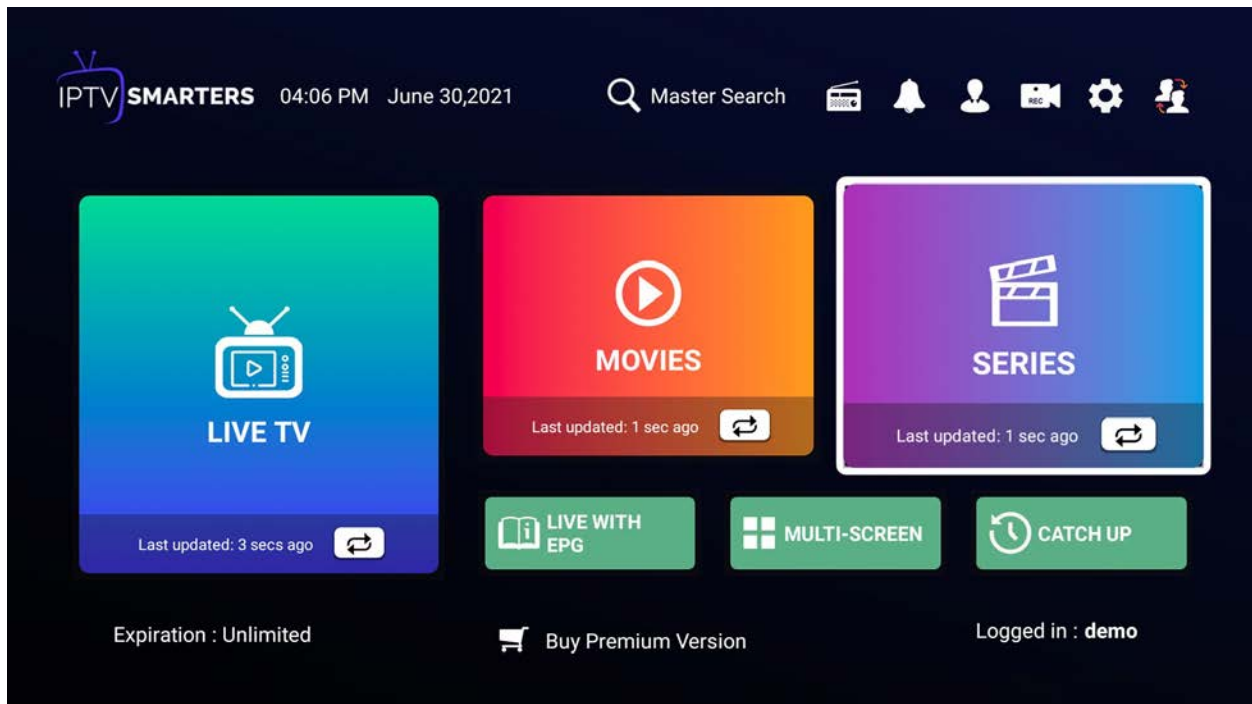

Figure 3: IPTVSmarters Home Screen

IPTVSmarters has numerous sections to view our content. They are as follows:

Live TV – This is where you can view Live TV.

Movies – This is where you can view our Movie lineup.

Series – This is where you can view our Series lineup.

**Note that we try to keep our service as up to date as possible, but sometimes it could take a week for the series to be available.*

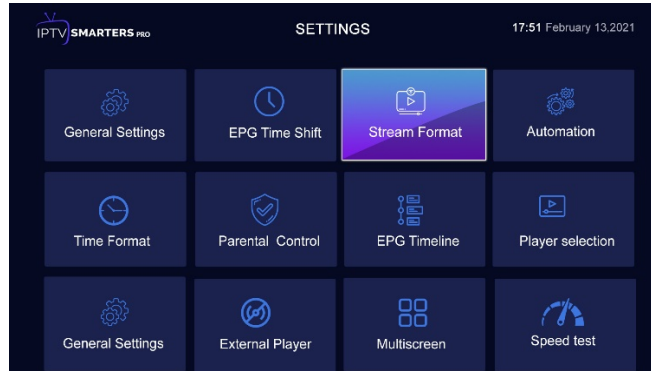

Some other most common features, shown on the top of IPTVSmarters are as follows:

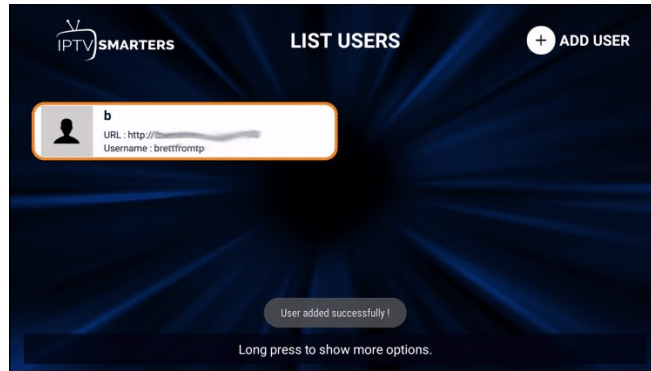

Account Info – This will have your account information and status. I will show you the username, along with expiration date.

Recording - If you want to setup recordings, you can use this feature. Please note that most devices require an external device, such as a hard drive.

Settings – In order to get access to most of these features, you might have to sign up for a premium account through IPTVSmarters. Its free for most devices and will unlock some extra features.

Switch Users - If you have multiple subscriptions, or upgrade and your username and password has changed, you will need to update or add a new user. Once you click add new user, it will take you to the login screen, as shown in Figure 2.

Support

I hope you found this guide useful in installing IPTVSmarters on your device.

We are here to support, so if you have any questions at all, don't hesitate to send us a message and we will answer as soon as we can. The best method is to create a ticket from your account. This is so one of our Service Team members can process the request as quickly as possible.

Feedback

We want to hear from you, whether is good or bad. We want this service to be one of the best out there and the only way to do that is with your feedback. Either send us a message using the ticket form from your account, or send us an email through hello@iptvcanada.tv.

Thanks again for your support!
IPTVCanada Team
